It only takes a minute to check your catheter.

A Bridge to Your Lifeline

Look

Look at your catheter dressing in the mirror.

It is clean and dry, and it covers the exit site (the place where the catheter comes out of your skin)

The dressing does not cover the exit site, it is wet or dirty, there is blood or pus on the dressing.

Feel

Feel over the catheter dressing. Do not remove the dressing!

The dressing is dry and there is no pain in the area under the dressing.

The dressing is wet, you have pain in the area under the dressing, something feels different, or you think you may have a fever.

If you notice any of the red "stop" signs during your daily catheter check, follow these instructions IMMEDIATELY:
